LITHIUM Z

Unrivaled Lithium Power **ATTENTION:**

Thank you for purchasing a Greenworks riding mower or UTV. CU500/CU800 UTV's and Lithium Z zero-turn mowers have a conditioning process which is required to maximize run time and battery life.

Follow these simple steps to break in your battery:

- 1. Upon delivery of your vehicle, charge the battery to 100%.**
- 2. Run the vehicle from full charge to 2-3% battery charge, and recharge to 100%.**
- 3. Repeat this 4 times, recharging fully to 100% each time.**
- 4. Once completed the battery will now perform at its peak level.**
